This is UNEVALUATED Information	
25X1	

1. At the beginning of January 1954, a unit of about 120 soldiers still guarded and operated the fuel depot at Kummersdorf. About 25 tank trucks and other trucks would daily pick up fuel at the service station, with most of the trucks making two to three trips a day.

B - boxcar, G - gondola car, T - tank car.

1. [] Comment. Statements on personnel strength have not changed over reports of October 1953. []. The motor vehicles belong to units of the GDFG, Third Gds Nacz Army and IX Arty Corps, which are located in this area. 25X1
2. [] Comment. Incoming fuel shipments amounted to about 680 metric tons in November, about 360 metric tons in December 1953 and 130 metric tons during the period from 1 to 16 January 1954. Compared with the rate of incoming fuel in the preceding months, there has been an increase in November, probably to refill stocks. The December and January rates of incoming fuel were below average, which resulted from a reduced consumption in winter. Traffic relations are known. The depot is supplied by GDFG fuel depots. 25X1
